

Fisher College Inventory Control System

DELTA TEAM: Ashley Payton, Kenzy Elmasry, Jason Martinez Morales,
Destinee Ukwuoma & Oseobulu Aigbedion

Project Agenda

- Project Overview- Scope
- Current Inventory Control System
- Clients' needs
- Proposed Solutions
- Chosen Solution
- Challenges Faced
- Outcome
- Next steps – Future
- Conclusion

Project Overview

Goal: Maintain an accurate inventory of the specific equipment located in labs and classrooms

Why?: Inventory was manually tracked and was inaccurate and tedious for upcoming audits

Stakeholders:

Amanda Charles, Jenn Strebb, and Josh Wilhide

Current Inventory System

Inventory was tracked manually by Jenn Streb after receiving documentation from procurement (Stratus)

Inventory was managed through a Microsoft Excel file

Issues/Difficulties:

Locations were not accurate for some items	Smaller items under \$5k were not tracked	Items did not have detailed descriptions or photos as indicators
--	---	--

Client Needs

INFORMATION**

CAPSTONE PROJECT 1.

Inventory database

In preparation for a college wide audit, we would like to catalog scientific/electronic equipment in each lab/room in the building.

Collecting the following information using an iPad, with the ability to export the data

- a. Minor category
 - 1. Audio & Visual (5 yr)
 - 2. Dining (10 yr)
 - 3. Facilities Operations & Maint
 - 4. IT, Computers, & Networking
 - 5. Scientific, Research, Classroom
- b. Department
 - 1. Biological Science
 - 2. Chemistry
 - 3. Mathematics
 - 4. Computer
 - 5. Environ Science & Studies Pgm
 - 6. OTS Networking
 - 7. Office Of Technology Services
 - 8. Physics, Astronomy & Geoscienc
 - 9. STEM Education
 - 10. SCITECH
 - 11. Science & Mathematics
- c. photo
- d. description/name
- e. building
- f. room #
- g. location (hallway/attic and describe)
- h. TU Tag #
- i. TU asset #
- j. Manufacturer Name
- k. manufactured year (optional)
- l. Model
- m. Date placed in service
- n. Original cost
- o. Current cost
- p. responsible PI
- q. Notes

Proposed Solutions

- Solution 1: Create a SQL database
- Solution 2: Create a Microsoft Form linked to a Microsoft Excel workbook
- Solution 3: Create a Power BI dashboard that populates from a Microsoft Excel workbook which is linked to a Microsoft Form

Chosen Solution

- Implemented a system using Microsoft Forms, Excel, and Power BI
- Staff submit inventory data via Forms on computers or iPads
- Data entered into a centralized Excel workbook
- Power BI dashboard visualizes the data

Challenges Faced

Microsoft Forms

- Data compatibility and reading errors

PowerBI

- The dashboard takes approximately 5 minutes to refresh the dataset
- Only one user can refresh the dataset to get live results
- Does not operate on Mac

Outcome

- Provided a foundation for inventory data collection and reporting within the Chemistry department
- Installed Microsoft Forms and Power BI on Ms. Charles' desktop system
- Created detailed use cases to guide future documentation and support system development.

Next Steps

Extend inventory tracking system to other departments such as Biology, Physics, and Environmental Science.

Facilitate a coordinated audit of inventory and equipment across the entire Fisher College of Science and Mathematics

Conclusion

The Delta Team successfully designed and implemented a scalable Inventory Control System for Fisher College. This project enhanced our skills in teamwork, problem solving, and real-world systems development, leaving room for future growth.

Thank You!
